

CONTENTS

Preface	11	
1. Multivariable Functions	23	<i>Chapter Map</i>
	24	<i>Mathematical Morals</i>
	27	domain and range
	30	\mathbb{R}^3 coordinate systems
	31	octant
	32	coordinate planes
	35	points in \mathbb{R}^3
	36	vectors in \mathbb{R}^3
	37	angle between vectors
	39	other planes in \mathbb{R}^3
	39	horizontal plane
	40	vertical plane
	44	intercepts
	49	normal vector
	53	graphing \mathbb{R}^3 functions
	60	contour map
	60	level curves
	85	traces ($z=k$, $x=k$, $y=k$)
	92	topographical map
	110	half-space
	116	<i>Challenge #1 contours</i>
	118	<i>Challenge #2 zipline</i>
<i>Graphic Novella</i>	129	<i>Descartes and the Fly</i>
2. Derivatives of Multivariable Functions	141	<i>Chapter Map</i>
	142	<i>Mathematical Morals</i>
	145	partial derivative
	146	d/dx and d/dy
	153	marginal interpretation of partials
	155	second partials
	162	gradient
	162	steepest ascent/descent
	169	contour map and path of steepest descent
	175	gradient vector field
	176	flowline
	188	tangent plane
	192	geometric interpretation of partials
	193	horizontal tangent plane
	193	critical point in \mathbb{R}^3
	208	directional derivative
	218	<i>Challenge #3: mountaineering</i>
	220	<i>Challenge #4: 18th hole</i>
<i>Graphic Novella</i>	231	<i>Lady Somerville, Superheroine of Calculus</i>

3. Applications of Derivatives	243	<i>Chapter Map</i>
	244	<i>Mathematical Morals</i>
	246	local extrema in \mathbb{R}^3
	250	critical point
	250	saddle point
	250	D-test with second partials
	260	contour map and local extrema
	264	vector field and local extrema
	268	global extrema in \mathbb{R}^3
	270	boundary points
	270	extreme value theorem
	280	contour map and global extrema
	280	filtered contour map
	291	optimization in \mathbb{R}^3
	295	Lagrange multipliers
	303	<i>Challenge #5: sculpture</i>
	305	<i>Challenge #6: ski resort</i>
<i>Graphic Novella</i>	313	<i>Kepler and the Wine Merchant</i>
4. Integrals of Multivariable Functions	323	<i>Chapter Map</i>
	324	<i>Mathematical Morals</i>
	326	Riemann sum
	329	tent surface
	334	double Riemann sum
	345	double integral and exact volume
	346	iterated integral
	351	Fubini's theorem
	351	separable $f(x,y)$
	351	reversing order of integration
	356	negative volume
	370	double integral and area
	379	surface area
	382	<i>Challenge #7: park</i>
	384	<i>Challenge #8: auditorium</i>
	386	<i>Challenge #9: roommates</i>
	388	<i>Challenge #10: fuel tank</i>
<i>Graphic Novella</i>	397	<i>Calculus Grows Up</i>
	406	<i>Surface Gallery</i>
	408	<i>Portrait Gallery</i>
	411	<i>Glossary</i>
